

## bernette Embroidery Software Customizer

Customize embroidery designs by combining lettering, monogram frames and appliqué designs. Edit embroidery designs with color and thread preferences and individual letters with unique fill stitches. The software includes 78 designs, 24 appliqué designs and 4 frames for monogramming.

## Key Features and Functions

### Lettering and Combining

Use Windows true type fonts for lettering and resize them from 6 to 60 mm (0.24" to 2.36"). Then combine your letters with any design.

### Hoops and Slow Redraw

Use the predefined bernette hoops or design your own.

Preview the stitching sequence with the slow redraw function.

### Monogramming

Color, scale, rotate or mirror designs and combine with lettering to create a personal monogram.

### Save Format

Edit the embroidery designs in ART 70 format and transfer to the bernette embroidery machine in EXP format.

### Appliqué Designs

With the CutWork tool, you can easily cut out an appliqué shape, which then can be stitched into the appliqué design.

### Fill Stitches

The larger the letters are, the greater the detail possibilities by using one of thirty fill stitches. Auto underlay easily adds an underlay stitch for enhanced lettering.

## The Perfect Companion

The bernette Embroidery Software Customizer forms the perfect duo with the bernette Chicago 7 sewing and embroidery machine or with the bernette Deco 340 embroidery machine.

### bernette Embroidery Software Customizer—overview of functions and features
